DMC was selected by the City of New Smyrna Beach to design and permit a public boat ramp and parking facility capable of holding 50 trucks and trailers. DMC worked with Quentin Hampton & Associates to develop a master plan for the project and will be responsible for all marine components, environmental resource permitting and compatibility with new stormwater systems. In addition, DMC submitted applications for Phase 1 (Design & Permitting) and Phase 2 (Construction) grants through the Florida Inland Navigation District (FIND). DMC was successful in securing nearly \$50,000 for Phase 1 and \$490,000 in Phase 2 construction funds for the City.

Key Elements

- Grants Application, Presentations and Administration
- Construction Cost Estimation
- Existing Environmental Resource Surveying
- Marine Structures Engineering and Design
- Environmental Resource Permitting through FDEP and Corps
- Ensure compatibility with new Stormwater System
- Volusia County Manatee Protection Plan Compliance
- Hydrographic and Topographic Survey
- Geotechnical Investigation

Project Status

Project Start: 2014
Project End: 2012
Engineering Fees: \$93,200
Construction Cost: \$950,000
